EXECUTIVE SUMMARY

Backend and Full-Stack Developer skilled in MERN, Python backend services, and real-time high-concurrency systems. Proven ability to reduce query latency, streamline multi-user workflows, and solve complex problems grounded in data structures and algorithms.

EDUCATION

B.E. — Computer Science and Engineering | Nandha College of Technology 2023 – 2027 | GPA: 7.8/10 | 0 Arrears
Coursework: DSA, OOP, DBMS, Operating Systems, Computer Networks

ACHIEVEMENTS & HONORS

- **Best Performer of the Year (2025–2026)** — Nandha College of Technology.
- **LeetCode Guardian** — Peak rating 2,345 (Top 0.42% globally).
- **NPTEL Topper** — National-level topper across multiple certification courses.
- **1st Prize, Nandha Innovation Day 2026** — Plus 1st/2nd/3rd podium finishes across external symposiums.
- **2× Winner** — Competitive AI Image Generation and Prompt Engineering contests.

PROFESSIONAL EXPERIENCE

- Google Developers Group (NCT) — Software Lead** Oct 2025 – Present
- Mentored 30+ students to complete the 21-lab Google Cloud Skills Boost certification pathway.
 - **Built campus tools on Firebase and GCP**, driving a 40% increase in developer event participation.
- Indian Institute of Technology, Ropar — MERN Stack Intern** Dec 2025 – Jan 2026
- **Built 10+ MERN features with RESTful APIs** supporting 500+ daily active users.
 - **Optimized MongoDB pipelines and indexes**, cutting query latency 35% and boosting throughput 1.5×.
- EANS Technologies — Backend Developer Intern** Jun 2025
- **Built Python backend for an e-learning gateway**, automating concurrent data processing pipelines.
 - **Designed normalized MySQL schemas**, improving retrieval speeds for user and course data.

PROJECTS

- KrishiRoute** — *MERN, Leaflet.js, React-i18next, Vercel*
- **Built an AI-powered agricultural logistics platform** using the Haversine Formula for rural routing.
 - **Ranked delivery destinations by real-time crop prices**, transit distance, and fuel costs.
 - **Added multilingual support for 13+ languages** via React-i18next with local storage caching.
- Smart Campus Canteen** — *Node.js, MongoDB, SQLite, Socket.io, Razorpay*
- **Built a real-time food ordering system** using WebSockets for live menu and inventory sync.
 - **Combined MongoDB for sales analytics** with SQLite for low-latency local state caching.
 - **Integrated OTP/Google OAuth and Razorpay** for secure, automated payment processing.
- AI Receptionist** — *Python, LiveKit, OpenAI Realtime API, SIP/Twilio*
- **Built a speech-to-speech AI voice agent** achieving sub-second response latency.
 - **Streamed audio directly from the LLM**, reducing latency by removing STT/TTS pipeline overhead.
 - **Cut operational costs 60%** via SIP/Twilio pipelines with integrated noise cancellation.

CERTIFICATIONS

Google Cloud Skills Boost (21 Labs) | NPTEL 4× Certifications: Java (Topper), DBMS, Data Analytics with Python, Joy of Computing in Python

TECHNICAL SKILLS

Languages: Java, Python, JavaScript / TypeScript, SQL
Frontend: React.js, HTML5, CSS3, Material UI
Backend: Node.js, Express.js, REST APIs, WebSockets (Socket.io)
Databases: MongoDB, MySQL, SQLite
Cloud & Tools: Google Cloud Platform, Firebase, Git, GitHub, Vercel, LiveKit
